

Use Case	Creates text entry	UC1			
Actors	User, Platform, Database				
Type	Essential				
Pre-condition	The user has access to the platform				
Post-condition	The text entry is registered in the database and returned to a main screen.				
Author	Ferna n	Date:	28/09/202 1	Versio n	1
Purpose	Register a user’s text entry				
Summary					
A user accesses the platform used and enters the desired text entry according to the conditions that the text entry must meet and uploads/sends the text entry. Upon submission, the text entry is registered into the database and the platform returns to the home page before entering the text entry.					

Normal course			
1	The user enters the platform	5	The system prints success feedback
2	Type in the text field the entry to be saved	6	The platform is returned to its initial state (empty in the shipping field)
3	Click to send (or a similar feature)		
4	The system registered text input to the database.		
Alternative courses			
4a	The system does not register text entry to the database		
5a	The system prints fault feedback and goes to 6.		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	Look for possible platforms to perform the deployment.		

Use Case	Assigns entries to be reviewed		UC2		
Actors	System Moderator Manager, Platform, Database				
Type	Essential				
Pre-condition	The moderator manager has access to the platform				
Post-condition	Lists with entradas are created and sent to the moderators				
Author	Karyme	Date:	11/10/2021	Version	1
Purpose	Organize text entries to generate lists and send them for review				
Summary					
The moderator manager accesses the entries, creates lists and sends them to moderators for evaluation					

Normal Course			
1	The moderator manager accesses the platform		
2	The moderator manager accesses text entries		
3	The moderator manager divides the entries and creates some lists for each moderator		
4	The moderator manager divides the entries and creates some lists for each moderator for evaluation		
Alternative courses			
3	Moderator manager does not create lists		
6	Moderator manager does not create lists		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	All entries must be sent to revision		

Use Case	Reviews entries accordingly to the post acceptance criteria or rubric	UC3			
Actors	Content Moderator, Platform, Database				
Pre-condition	The content moderator has access to the platform				
Post-condition	Entries must be evaluated according to the acceptance criterion or rubric, assigning a score per entry				
Author	Karyme	Date:	12/10/2021	Version	1
Purpose	Assign a qualification to define the acceptance status of each entry				
Summary					
The content moderator accesses the platform and the lists of text entries, selects one and through a rubric assigns a specific score to be able to establish if it will be published or not.					

Normal Course			
1	The content moderator accesses the platform		
2	The content moderator accesses the list created		
3	The content moderator selects an entry		
4	The content moderator once assigns a qualification according to a rubric		
Alternative courses			
3	The content moderator does not evaluate an entry		
4	The content moderator does not assign the qualification well in his first attempt		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	The content moderator can only evaluate once each entry		

Use Case	Send the entries' review acceptance consensus		UC4		
Actors	Content Moderator, Platform, Database				
Type	Essential				
Pre-condition	The Content moderator has access to the platform				
Post-condition	Send all the entries that were accepted to the moderator manager				
Author	Geovanna	Date:	11/10/2021	Version	1
Purpose	Organize all the entries that were accepted and send them to a final review				
Summary					
The content moderator accesses the entries, select all the entries that were accepted, make a list with them and then, send them to the Moderator Manager for a final review.					

Normal Course			
1	The content moderator accesses the platform		
2	The content moderator selects the entries that have an approved qualification		
3	The content moderator makes a list with all the accepted entries		
4	The content moderator sends the list to the Moderator manager		
Alternative courses			
1	The content moderator cant access the plataform		
3	The content moderator does not include in the list some accepted entries		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	Accepted entries by the content moderator doesn't mean that those entries are going to be posted		

Use Case	Accepts/Rejects entries according to the moderators' consensus	UC5			
Actors	System Moderator Manager, Platform, Database				
Type	Essential				
Pre-condition	The moderator manager has access to the platform				
Post-condition	Accepted entries' must be evaluated for second time by the Moderator Manager				
Author	Geovanna	Date:	11/10/2021	Version	1
Purpose	Be sure about what type of content are we going to have on the platform and don't make mistakes				
Summary					
The moderator manager accesses the accepted entries and review them one more time					

Normal Course			
1	The moderator manager accesses the platform		
2	The moderator manager receives the text entries		
3	The moderator manager reviews the accepted entries		
4	The moderator manager accept the entries		
Alternative courses			
2	Moderator manager does not receive the accepted entries		
4	Moderator manager does not accept all the entries		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	Just the moderator manager can decide what entries are going to be posted		

Use Case	Publishes accepted post		UC6		
Actors	System Moderator Manager, Platform, Database				
Type	Essential				
Pre-condition	The moderator manager has access to the platform				
Post-condition	Post the entries accepted and selected in the platform				
Author	Geovanna	Date:	11/10/2021	Version	1
Purpose	Make the selected entries visible for all the users				
Summary					
The moderator manager access to the selected entries and publish them in the platform					

Normal Course			
1	The moderator manager accesses the platform		
2	The moderator manager accesses accepted text entries		
3	The moderator manager publishes the entries on the platform		
Alternative courses			
3	Moderator manager does not publish the entries		
Other data			
Importance	High	Urgency	High
State	pending		
Comments	Only the Moderator Manager can publish entries
