Use Case		Creates text entry	UC1	
Actors		User, Platform, Database		
Type		Essential		
Pre-condition		The user has access to the platform		
Post-condition		The text entry is registered in the database and returned to a main screen.		
Author		Fernan	**Date:** 28/09/2021	**Version** 1
Purpose		Register a user's text entry		

Summary
A user accesses the platform used and enters the desired text entry according to the conditions that the text entry must meet and uploads/sends the text entry. Upon submission, the text entry is registered into the database and the platform returns to the home page before entering the text entry.

Normal course

1	The user enters the platform	5	The system prints success feedback
2	Type in the text field the entry to be saved	6	The platform is returned to its initial state (empty in the shipping field)
3	Click to send (or a similar feature)		
4	The system registered text input to the database.		

Alternative courses

4a	The system does not register text entry to the database
5a	The system prints fault feedback and goes to 6.

Other data

Importance	High	**Urgency**	High
State	pending		
Comments	Look for possible platforms to perform the deployment.		

Use Case	Assigns entries to be reviewed	UC2
Actors	System Moderator Manager, Platform, Database	
Type	Essential	
Pre-condition	The moderator manager has access to the platform	
Post-condition	Lists with entradas are created and sent to the moderators	

Author	Karyme	**Date:**	11/10/2021	**Version**	1

Purpose	Organize text entries to generate lists and send them for review

Summary

The moderator manager accesses the entries, creates lists and sends them to moderators for evaluation

Normal Course	
1	The moderator manager accesses the platform
2	The moderator manager accesses text entries
3	The moderator manager divides the entries and creates some lists for each moderator
4	The moderator manager divides the entries and creates some lists for each moderator for evaluation
Alternative courses	
3	Moderator manager does not create lists
6	Moderator manager does not create lists
Other data	

Importance	High	**Urgency**	High
State	pending		
Comments	All entries must be sent to revision		

Use Case	Reviews entries accordingly to the post acceptance criteria or rubric	UC3		
Actors	Content Moderator, Platform, Database			
Pre-condition	The content moderator has access to the platform			
Post-condition	Entries must be evaluated according to the acceptance criterion or rubric, assigning a score per entry			
Author	Kary me	**Date:**	12/10/2021	**Versio n**	1
Purpose	Assign a qualification to define the acceptance status of each entry			

Summary
The content moderator accesses the platform and the lists of text entries, selects one and through a rubric assigns a specific score to be able to establish if it will be published or not.

Normal Course

1	The content moderator accesses the platform
2	The content moderator accesses the list created
3	The content moderator selects an entry
4	The content moderator once assigns a qualification according to a rubric

Alternative courses

3	The content moderator does not evaluate an entry
4	The content moderator does not assign the qualification well in his first attempt

Other data

Importance	High	**Urgency**	High
State	pending		
Comments	The content moderator can only evaluate once each entry		

Use Case	Send the entries' review acceptance consensus	UC4		
Actors	Content Moderator, Platform, Database			
Type	Essential			
Pre-condition	The Content moderator has access to the platform			
Post-condition	Send all the entries that were accepted to the moderator manager			
Author	Geovanna	**Date:** 11/10/2021	**Version**	1
Purpose	The system is able to accept scores and update them to change their status			

Summary

The content moderator is allowed by the system to access the scores and make the corresponding updates.

Normal Course	
1	The content moderator accesses the platform
2	The content moderator selects entries that have not yet been fully approved
3	The content moderator adds the scores to the system, and this makes the updates

Alternative courses	
1	The content moderator can't access the platform
3	The content moderator does not allow the access to the system

Other data

Importance	High	**Urgency**	High
State	pending		
Comments	The only scores that could be released are those that were accepted by content moderators		

Use Case	Accepts/Rejects entries according to the moderators' consensus	UC5		
Actors	System Moderator Manager, Platform, Database			
Type	Essential			
Pre-condition	The moderator manager has access to the platform			
Post-condition	Accepted entries' must be evaluated for second time by the Moderator Manager			
Author	Geovanna	**Date:**	11/10/2021	**Version** 1
Purpose	Be sure about what type of content are we going to have on the platform and don't make mistakes			

Summary
The moderator manager accesses the accepted entries and review them one more time

Normal Course	
1	The moderator manager accesses the platform
2	The moderator manager receives the text entries
3	The moderator manager reviews the accepted entries
4	The moderator manager accepts the entries

Alternative courses	
2	Moderator manager does not receive the accepted entries
4	Moderator manager does not accept all the entries

Other data			
Importance	High	**Urgency**	High
State	pending		
Comments	Just the moderator manager can decide what entries are going to be posted
